

## **PIG IRON, PASTIES AND THE WORLD FAMOUS PICTURED ROCKS**

### **(4 DAY/3 NIGHT TRADITIONAL PACKAGE)**

This package features the world famous Pictured Rocks which were the inspiration for Longfellow's epic poem, *The Song of Hiawatha* and the historic Marquette Iron Range where over 2 billion tons of iron have come out of the ground since mining first began in 1845.

Package highlights include an Iron Mining Heritage Tour featuring the Michigan Iron Industry Museum and historic Marquette – the principle port for the shipping of iron. Also included is an awe-inspiring boat cruise along the south shore of Lake Superior where you will see Grand Island and our country's first National Lakeshore - the magnificent Pictured Rocks.

During your visit you will learn about the rich and colorful history of the still-active Marquette Iron Range and see the massive iron ore docks that grace Marquette's two deep water harbors. You will also view over 50 miles of scenic Lake Superior shoreline and see Munising Falls - one of the most beautiful and accessible waterfalls in Michigan's Upper Peninsula.
